

## ENSURE COVID-19 SAFETY IN YOUR ORGANIZATION WITH CERTIFICATION FROM SRI LANKA STANDARDS INSTITUTION

Sri Lanka Standards Institution provides a great opportunity to any organization to continue organizational operations while ensuring Covid-19 safety and controlling spreading of COVID-19 through an independent, third party certification. This certification enables the organization to demonstrate organizational ability and commitment on providing safety from Covid-19 for all interested parties through its activities, including outsourced activities, products and services offered by the organization.

Sri Lanka Standard **SLS 1672:2020** on “Covid-19 safety management systems requirements” is applicable for certification for any organization regardless of type, size or nature of the activities performed by it to ensure Covid-19 safety within the context of the organization.

Enjoy benefits of certification with confidence on:

- ▶ Ability to improve organizational safety practices to ensure safety of all staff, visitors, products and services offered by the organization through a risk management process with adequate controls against spreading of Covid-19 to family members, community and to the country.
- ▶ Enhancing staff morale to minimize labour turnover.
- ▶ Ability to improve stakeholder confidence to support scaling-up of the business operation.
- ▶ Possibility of integrating the COVID-19 safety management system with the organization’s business processes, overall management structure and existing management systems.
- ▶ Ability of organizational practices to meet the COVID-19 safety requirements through an internal verification process and to take preventive actions against potential threats.
- ▶ Projecting as a socially responsible organization in the global fight against Covid-19 pandemic.
- ▶ Obtaining partner and global recognition.
